CIRCLE

The CIRCular Economy
through Integrated LEarning

The June newsletter is the sixth and final step of our journey, dedicated to circular economy.

Funded by the European Union under the Erasmus + program, the CIRCLE-CIRCular Economy through Integrated LEarning in VET-project aims to create educational materials for trainers in the VET (Vocational Education and Training) sector in introducing young people to principles of the circular economy.

The project, closed in May, explored the theme of the circular economy with reference to four key sectors of the European economy: Tourism, Transport and Logistics, Agriculture and Construction.
